The Physician Dashboard provides major workflow advantages by giving you one-screen access to multiple types of information and functions:

- **Investigations:** View all patient test results from this tab whether received electronically or scanned in.

- **Encounters:** View existing encounters or start entry of a new encounter.

- **Appointments:** See the selected day's appointments and go directly to the scheduler to view or book appointments.

- **Patient Manager:** Quickly track patients as they move through the stages of the appointment queue with quick access to the information you need most.

- **Forms:** Use imported or customized form templates to order tests from lab work to imaging.

- **Tasks:** See what tasks are due when and add new tasks.

- **Patient Search/File:** Use the Search button to find the desired patient and go directly to their chart. Alternatively, select the Patient File button to quickly display the demographics and the patient's last and next appointments.

- **Health Card Validation:** Instantly validate the health card of the patient highlighted on the Dashboard.

- **Web Messaging:** Access and respond to patient messages at any time.

Unlike Some Vendors, ABELMed:

- Will never sell your data or hold it hostage.
- Offers a fully-certified solution.
- Provides over four decades of experience securing healthcare.
- Provides access to software downloads, tutorials and webinars on our ABELMed Customer Portal.
- Offers training online or in a fully-equipped classroom at our office headquarters.
- Includes 24/7 telephone support.

Feature Highlights

With customizable workflows, you can streamline your practice to save time, increase efficiency and optimize patient care.

- **Complete Electronic Medical Records (EMR)** that can accommodate the needs of all specialties.

- **Patient Manager** tracks arrival time, wait time and progression through the stages of each patient visit.

- **Authorization Manager** securely restricts access to specific program functions/sensitive data based on your user defined roles.

- **Chronic Disease Management Flowsheets** track the status of patient conditions using customizable parameters for disease tracking.

- **Prescriptions Module** detects potential drug interactions and allows you to renew multiple medications simultaneously.

- **CPP/Patient Encounters/Progress Notes** – custom designed templates for your standard encounters to improve accuracy and speed.

- **Referral and Document Management** – generate referral letters from existing Encounter Notes, CPP and lab results and track for follow-up.

- **Preventative Care Management** – the Contact Manager tracks patients who need appointments for preventative care based on appropriate time intervals.

- **Integration with Dragon Medical** to record voice files that are converted to text and loaded directly into ABELMed patient encounter records.

- **Welch Allyn Interface** imports vital sign measurements directly into ABELMed from Welch Allan devices.
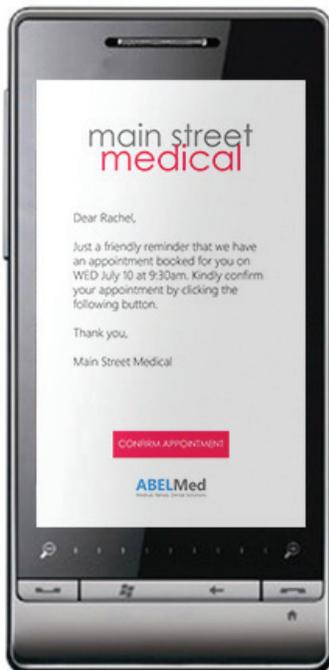

Easy to use features that help boost practice success

Appointment Reminders and Patient Portal

Designed exclusively for your ABELMed system, the email and text messaging-based system is secure and easy to use.

- **Patient Convenience:** Patients can easily respond to appointment notices.

- **Reduced Costs:** Informing patients about appointments becomes more scalable.

- **Reduced No Shows:** Patients are more likely to keep appointments.

- **Increased Booking Rates:** Patients are more likely to schedule.

- **Patient Engagement:** Patients become more actively involved in their healthcare with access to the Patient Portal.

Mobile App

Enjoy secure remote access to your appointment schedule and other ABELMed data from your mobile phone or tablet. ABELMed Mobile runs on Android and iPhone platforms.

> " Just wanted to let you know how happy both Dr. Samji and myself have been with ABELMed. Your products, as well as prompt and exceptional service, are greatly appreciated. Your tech support has been tremendous. Thank you for making my work so much easier.
>
> Gulnar Samji, Office Manager

Remote Data Backup and Recovery
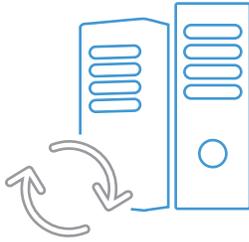

Benefit from our Remote Data Backup and Disaster Recovery Virtual Server Services

- Encrypts your data in transit and stores your encrypted files securely off-site where they can be retrieved at any time.

- Saves you the time, effort and responsibility of running daily backups.

- Protects your practice against failed, lost or stolen backups.

- Saves the cost of back up media and/or other external backup or verification services.

The Latest Features for Practice Growth And Protection:

- **Reputation Management:** Facilitate positive, online patient reviews to attract new patients that will help your practice grow.

- **AppGuard:** Goes beyond simple virus protection by running only approved functions within applications,so they don't allow viruses and malware to take over.

Coming Soon New Features for Increasing Practice Efficient And Productivity

- **Payment Card Processing:** Eliminate manual payment card entries and simplify bank reconciliation with ABEL Pay.

- **Reporting and Analytics:** Transform your practice data into stunning visual reports that make it easy to analyze clinical data and make actionable, data-driven decisions that improve patient care.
