

Setting up Health Card Validation in ABELMed

To run Overnight Batch Eligibility Checks (OBEC) and Health Card Validations (HCV), you must select the Provider whose GoSecure account your practice will use for transmitting OBEC and HCV data.

1. Click **Setup** and choose **EDT Setup**.
2. The EDT/HCV Setup dialog appears displaying the following in the EDT Accounts table:
 - All “Groups” created and assigned to Providers on the Provider File Update screen.
 - All “Providers” with an MCEDT number and the EDT (Y/N) option set to “Yes” on the Provider File Update screen will be automatically listed.
3. To Assign the OBEC/HCV Account: 1, click the down-arrow in the OBEC/HCV Account list box and select the Provider whose GoSecure account will be used by your practice for OBEC and Health Card validations.
