

ABELSoft Inc. Celebrates 40 Years in Business

ABELSoft Inc., a leading provider of dental and medical practice management and clinical software, today proudly announced that it is celebrating its 40th anniversary.

Over the past four decades, ABELSoft Inc. and its subsidiaries ABELDent Inc. and ABELMed Inc. have been at the forefront in providing healthcare professionals with technologies that add value by supporting optimum patient care and efficient business practices.

"Technology for healthcare was in its infancy when we launched our computerized billing system – it was real innovation at the time. Now, dentists, physicians and their team members are embracing digital transformation on a scale that was difficult to imagine back then. It is exciting to be in this industry today and we are proud to still be providing innovative solutions that include advanced technologies and proven tools for business success such as Microsoft Dynamics 365 for Finance and Operations.

"For example, the integration of our products with Dynamics 365 provides accurate reports that will inform sound management decisions and lead to improved business results. Specifically, ABEL users will have fingertip access to advanced clinical and practice management analytics, integrated accounting, clinical and financial reporting, streamlined human resource management including payroll, and much more," said Arun Rele, Chairman and Founder.

Employing a team of 65+ people to serve its growing market, ABELSoft Inc. develops and distributes ABELDent and ABELMed software and integrated patient portals. In addition, the company offers data backup and recovery solutions and provides implementation, training and consultation for small to midsize healthcare offices and clinics.

"This is a tremendous milestone for ABEL. Our sincere thank you to our employees, customers and business partners for their dedication and loyalty over the years. As we move forward, the company's strength and its successes will continue to depend on our people, our partners and our clients' trust," said Angela Spinks, CEO

Since its inception, ABELSoft Inc. has achieved many milestones in the interest of improving its products and services. For example, achieving Microsoft Gold Certified Partner in 2006, ISO 13485:2003 certification in 2010 and recently winning the 2016/2017 Microsoft Dynamics Independent Software Vendor (ISV) of the Year award for Canada.

The company marked the anniversary by hosting a series of meetings that focused on its next development phase including plans for expanding its reach into global markets. Celebrations kicked off with a company barbeque and a variety of social events will continue throughout the year.
