

## **NEWS RELEASE**

### ***ABELMed EHR-EMR/PM v12***

#### ***Is Now EMR 4.1 Approved and Continues to be Funding Eligible in Ontario***

-- **BURLINGTON, ON, April 16, 2012** – ABELMed Inc. ([www.abelmed.com](http://www.abelmed.com)), is pleased to announce that as of April 1, 2012, physicians in Ontario continue to be eligible to receive funding from OntarioMD for ABELMed EHR-EMR/PM v12, the company's fully integrated Electronic Medical Records and Practice Management software.

ABELMed EHR-EMR/PM v12 passed the Validation Execution stage after undergoing compliance testing against Ontario's EMR Specification 4.0 requirements followed by Reference Site validation at Brantford Medical Clinic and LMC Endocrinology Centres.

Arun Rele, Chairman and CEO of ABELMed Inc. says, "As a leader in the field of health care IT since 1977, ABEL has remained dedicated to providing Ontario physicians with, user friendly, practice enhancing Electronic Medical Record and Practice Management solutions. This latest achievement is another important step in our ongoing commitment to deliver, secure and user friendly IT solutions to the healthcare providers in our province."

In addition, Rele says, "As a value-add service, we also offer OntarioMD approved Vendor Collaborative Network (VCN) services. Small and medium sized practices that may not have the means to employ a dedicated IT consultant will benefit from our VCN services by achieving significant savings in EMR implementation and maintenance. Large, multi-specialty clinics will also benefit from our expertise and recommendations regarding VCN related services if they choose not to employ their own IT resources."

Whether physicians are looking to implement an EMR for the first time or switch EMR systems, ABELMed EHR-EMR/PM v12 offers comprehensive capabilities and administrative features to provide a total solution that adapts to the workflow requirements of any practice. Some of the key functionalities in the software's latest version include: Chronic Disease Management including diabetes management, Pan Canadian Primary Health Care EMR content standards support and interfaces to the Ontario Laboratories Information System (OLIS) and the Hospital Report Manager (HRM).

ABELMed Inc. has also achieved ISO 13485:2003 certification - a quality management standard for medical devices. State-of-the-art Microsoft .NET technology, superior quality software, ease of use and customer satisfaction are ABEL's core strengths. Our Ontario EMR Specification 4.1 approved EMR, ABELMed EHR-EMR/PM v12 seamlessly integrates the clinical and business aspects of a medical practice to enable health care professionals to provide better care, faster. As a privately held, self-financed, debt free company, we are not constrained by external lenders or other entities and are dedicated to offering physicians the best value for their investment in our products and services. ABEL is committed to serving the health care IT needs of Ontario physicians for years to come.
